

tech goes home

What is TGH?

Tech Goes Home (TGH) strives to ensure that people are equipped with the tools, training, and access to support 21st century skill development. Courses are for young children ages 3-6 and their parents or caregivers to attend together.

These courses are taught on iPads by early education specialists. The curriculum is built around educational and social-emotional learning apps that focus on early language, literacy, and STEAM skill-building. Families practice early learning strategies and discuss challenges and opportunities in parenting with technology. The TGH Early Childhood program aims to help parents prepare their children for success in kindergarten and beyond.
